IMPORTANT: Please note we DO NOT find the job for the student. This they need to do for themselves. However the "support" given helps them do this with little or no problems.

PLUS Internship. Satisfy your requirements by doing a volunteer internship experience with a company in Auckland.

Our Internship programme is operated on a case by case basis, which means that an applicant must first send an application to Worldwide school. This should include:

1/ Sector they wish to do an Internship. They should include more than one Internship possibility.

2/ CV of applicant - including previous work experience and study.

3/ Time of year they would like to come and length of English study and Internship.

Once we have accepted the applicant at Worldwide School:

4/References from the applicant's University, school or employer should be sent. In business and professional positions, it is necessary the student have at least one reference from an employer, including what they did during the job or internship.

It is necessary for the host company to interview the student before a placement is confirmed. This is as much for the student as for the company because it is a chance for them to see if the project and placement is suitable for them.

It is very important that our internship applicant's understand that the Host Company will ask them to complete tasks not directly related to their degree. For example; a marketing graduate with typing skills may do some data entry for their company as well as assisting and observing an advertising campaign. It is quite a large commitment for companies to accept a student because they take up time of at least one staff member, and if the Intern is taking some of the workload, the programme benefits the company as well as the Intern.

As each student's application is individually assessed, an area not included with the placement possibilities list may still be possible. The exception is Medicine. Under New Zealand law Internships in medicine are not allowed.
